An Bhaint le Misean / le Fís / le hAidhmeanna na Scoile

Tá baint ag an mbeartas le fealsúnacht agus le saintréithe na scoile sa tslí is go gcuideoidh sé le atmaisféar slán is sona, dea-eagraithe agus comhbháach a chruthú sa scoil. Cad is Druga ann?

Sé an tuiscint atá againn ar ‘dhruga’ sa scoil seo ná ceimiceán ar bith a athraíonn an chaoi a n-oiríonn an corp agus conas mar a iompraíonn an duine é féin mar aon lena cuid mothúchán.

Substance Misuse Policy

Scope of Policy

This Policy applies to all students, teachers, parents and other users of the school premises. It applies during school time (including breaks) and to all school related activities.

Relationship to Schools Ethos and Mission Statement.

The substance use policy reflects the school ethos in that it will help towards the provision of a well-ordered, caring, happy and secure atmosphere. It will help to enhance the self-esteem of children and imbue in the pupils respect for people and property and encourage in them the idea of being responsible.

Rationale:

- The world in which we live presents young people with many challenges that affect their health and well being. Exposure to alcohol, tobacco and drugs is part of this reality. This policy provides a means to help children deal effectively with these issues.
- The Education Act (1998) provides that schools should promote the social and personal development of students and provide health education for them.
- The National Drugs Strategy, “Building on Experience”, is now Government Policy and it requires schools to have a substance use policy in place.

Definition of a Drug

A drug can be defined as a chemical, which causes changes in the way the human body functions mentally, physically or emotionally.

Goals/Objectives:

- To set out in writing the framework within which the whole school community manages issues relating to substance use.
- To develop a shared understanding of the term “drugs”
- To influence people towards healthier activities and away from the need to use drugs
- To provide education on drugs, alcohol and smoking to children
- To help develop sensible attitudes to drugs
- To help prevent children from misusing drugs
- To help the child develops personal strengths and values that can reduce the likelihood that he/she will become involved in drugs.
- To set out the procedures for dealing with incidences involving alcohol, smoking and drugs.

Policy Content:

The policy content is divided into 4 sections

- I. Education concerning substance use
- II. Management of alcohol, tobacco and drug-related incidents
- III. Provision for training and staff development
- IV. Roles and Responsibilities

(i) Education concerning substance use:

The education of alcohol, tobacco and drugs is provided within the broader context of a Social, Personal and Health Education (S.P.H.E.) programme through the Misneach (Walk Tall) Programme.

Age appropriate content will be chosen and activity based teaching methods will be used as suggested in the SPHE curriculum.

Each teacher will teach their class or classes within the time allotted to SPHE subject.

Any use of an outside visitor/speaker (nurse, garda, social worker) to enhance the work done in class may be considered in context of the full SPHE programme and in such cases a class teacher will always be present also.

(ii) Management of alcohol, tobacco and drug related incidents;

Smoking

- The school is smoking free area. (Including ecigarettes etc.)
- Students are not permitted to smoke or possess cigarettes on the school premises.
- Visitors will comply with the no smoking policy.
- Pupils found smoking on school premises will be reported to the Principal and parents will be informed.

{Under the Public Health (Tobacco) Acts 2002-2015, smoking is forbidden in enclosed places of work. This includes office blocks, various buildings, public houses/bars, restaurants and company vehicles (cars and vans). The purpose of this ban is to offer protection to employees and the public who are exposed to the harmful and toxic effects of tobacco smoke in the workplace. Smoking has been identified as a major cause of heart disease and a significant contributor to lung cancer.}

Alcohol

- The school is an alcohol free area.
- Pupils will not be allowed to bring alcohol into the school or to consume alcohol in school or during any school activities.
- If a teacher is of the opinion that a student is under the influence of alcohol, s/he will immediately inform the Principal and consult on what action should be taken.
- Where a student comes to school under the influence of alcohol, their parents will be called in to take them home.
- Students breaking these rules will be dealt with according to the school's disciplinary procedure.

Illicit Drugs, Paraphernalia and Solvents

- Students are forbidden from being in possession of or using illicit drugs or solvents in the school premises.
- Illicit drug and/or associated paraphernalia found on school premises should be locked away and the Gardaí contacted to dispose of them. Teachers are advised not to transport illicit substances at any time.
- If a teacher is of the opinion that a student is under the influence of illicit drugs or solvents, s/he will immediately inform the Principal and consult on what action should be taken.

-Where the school suspects trafficking of illicit drugs, an investigation will be carried out. Parents of any student involved will be informed. The advice and assistance of the Garda Juvenile Liaison Officer will be sought.

-The school B.O.M. will expect parents to inform the Principal or teacher if they suspect their child of drug taking.

The school will endeavour to respond to incidents involving alcohol, tobacco and drug use in a planned and considered way. In certain cases it may be necessary to seek legal advice. Due care will be taken in deciding on the nature of the response i.e. pastoral or disciplinary. An appropriate pastoral response to an incident involving alcohol, tobacco or drug use may include referral to a support agency. Expulsion is the ultimate sanction and it is stressed that this measure is only used as a last resort as it can have the effect of alienating a student from mainstream sources of help and may result in this student coming more involved in the culture of drugs abuse. Where a member of staff requires support, the school will facilitate links with the Employee Assistance Programme.

(iii) Provision for Training and Staff Development

At present primary schools are assisted in this area by the PDST and Walk Tall Support Office.

(iv) Roles & Responsibilities

The following are the roles and responsibilities of the various school community members with regards to this policy:

- The teachers will teach the OSPS curriculum and use the Walk Tall programme. Teachers will carry out assessment on progress and learning of children and will assess the suitability of materials. The Principal will oversee work of teachers.
- The board will support the programme by providing materials and training as necessary.
- Parents can support this policy by becoming familiar with its contents and engaging with lessons as they arise in school-i.e. asking children about lessons on alcohol, drug abuse as worksheets/letters are sent home.
- The school wishes to make clear that the primary role of substance misuse prevention rests with the parents.

Success Criteria:

The success criteria of this policy will be based on the following indicator:

The full implementation of the OSPS programme and Walk tall Programme in the school every year.

This policy will be reviewed according to the Policy Review Schedule.
